

SYED KHADIR ANEEQ

PYTHON DEVELOPER | AI/ML & Automation

+91-9087656363 | [E-mail](#) | [LinkedIn](#) | [GitHub](#)

SUMMARY

Python Developer with experience in AI-powered automation, cloud security auditing, and intelligent application development. Skilled in **Python**, **FastAPI**, **Selenium**, **LLM integration**, and automation frameworks, with industry exposure at TCS and ISRO.

EXPERIENCE

Assistant System Engineer – Tata Consultancy Services (TCS)

Dec 2024 – Present | Hyderabad

- Manage **SAP-based claims and warranty operations**, ensuring data accuracy and process compliance.
- Utilize **ServiceNow** for incident tracking and workflow management to improve resolution efficiency.
- Coordinate with **cross-functional teams** and **external vendors** to resolve system and operational issues.

Intern – ISRO SDSC-SHAR ([GitHub](#))

Apr 2024 – May 2024 | SriHarikota

- Developed a **PLC-based control system** for pump operations in LINAC cooling systems.
- Integrated control logic with SCADA for monitoring and real-time operation. Simulated **fail-safe interlocks** to handle sensor failure scenarios and improve system reliability.

PROJECTS

AI Agent for Cloud Security Configuration Audit & Recommendations ([GitHub](#))

Tech Stack: Python, AWS, LLMs, JSON, YAML

- Developed AI-powered cloud security auditing agent aligned with **CIS/NIST** standards.
- Automated **IAM, S3, EC2, RDS**, and **CloudTrail** security assessments.
- Generated severity-based TXT/PDF reports with intelligent remediation recommendations.

SnapVoice – AI based Attendance Management Application ([GitHub](#))

Tech Stack: Python, Streamlit, OpenCV, Face Recognition, Voice Recognition

- Developed an AI-powered attendance management system using **Face and Voice Recognition** for secure user verification.
- Designed separate interfaces for Students and Teachers to manage attendance and subject handling efficiently.
- Implemented **authentication** and **real-time attendance tracking** in an interactive web application.

Prompt2Text – AI-powered Test Case Generator ([GitHub](#))

Tech Stack: Python, FastAPI, Ollama (Llama3), Selenium, JSON

- Developed an AI-powered QA automation tool to generate **functional** test cases and **edge cases** from feature descriptions.
- Integrated **Llama3** using **Ollama** to generate structured and intelligent test scenarios automatically.
- Enabled **Selenium** automation script generation with **JSON**-based output for improved testing efficiency.

Automation Bot for CRM Application using Automation Anywhere Bot Launcher ([GitHub](#))

Tech Stack: Automation Anywhere, Python, CSV, Web Automation

- Developed and deployed an automation bot to capture customer data from multiple websites for CRM processing
- Automated CSV generation, data updates, and email distribution to relevant agents, reducing manual effort
- Streamlined operational workflows by integrating automated data collection and reporting processes

SKILLS

- | | |
|--------------------------|---|
| • Programming Languages: | Python, Java, SQL, C |
| • AI/ML & Backend: | FastAPI, LLMs, RAG, AI Agents, Prompt Engineering, REST APIs, Pandas, PyTorch |
| • Automation & Testing: | Selenium, Automation Anywhere, Cucumber, Nightwatch |
| • Tools & Platforms: | Git, GitHub, Linux, AWS, SAP, ServiceNow, Streamlit |
| • Core Concepts: | Automation, Machine Learning, Cloud Security, Data Analytics, API Integration |

EDUCATION

B.E – Electronics and Communication Engineering | Prathyusha Engineering College | 2020 – 2024 | CGPA: 8.96

CERTIFICATES

- AWS certified Developer - Associate
- Automation Anywhere Certified Essentials RPA Professional (Automation 360)
- Generative AI with Vertex AI: Prompt Design – Google Cloud
- Introduction to Networks certification - CISCO
